GEOiDX what is new?

We give you an overview of the most important innovations in a nutshell.

Layout

As you can see in previous newsletters, the layout has changed a bit.

- Buttons are new;
- Windows have become panels that you can drag and drop.

Drawing and Measuring status

The measuring status is like MS Excel equipped with multiple tab sheets and is super fast.

- You can open multiple drawings;
- Each drawing has one or more measuring statuses, allowing you to copy and paste between them 1*);
- Additional columns are added that can also be exported to for example MS Excel;
- You can group result lines and group totals are instantly visible;
- You can use formulas as in MS Excel;
- You can easily measure and calculate sloped surfaces (roofs) with the factor column.

Prepaid online IT support

GEO provides online IT support to SME's and sole proprietorships. For all your questions regarding your network, PC or peripheral equipment, please contact our Supportdesk. For prices and conditions, please contact our Sales Department via Info@geo-instrument.com or +31-26-3619900.

line color.

GEOiDX-Menu

The well known menu with most used cost-estimating coding etc.

- Now includes multiple tab sheets 1*) to easily switch, copy and paste in between them;
- Allows adding a default value to a cell which speeds up the take-off.

1*) *You can name the measuring statuses or tab sheets as you are used to in MS Excel.*

Measuring functions i.e.

- If you measure Area + Circumference, than you are able to copy the Circumference and paste it in any result line;
- Rectangular areas can now also be measured by just two points;
- You can combine measurements with different scales onto one result line;
- You can perform measurements in 3D CAD drawings.

Drawing functions

The program includes several drawing functions. You do not need to switch to another mode for this. Drawn entities are included in a separate layer and panel and not in the measurement status.

Note. This release does not yet contain the Presentation part, the work on that is still in progress. We keep you posted of course.

Best regards,
GEO Instrument, pioneer in practical solutions
